

THE GIFT
of sight.

LODEN iVISION CENTERS
WINTER 2017

At Loden iVision Centers, our mission is to uniquely provide the most advanced vision technology and best possible care, while exceeding our patients' expectations in every way.

This is and has been our guiding light since we opened the doors to our first location in Nashville in 1999.

Our business began as a specialty center for vision correction surgery. We still pride ourselves in being the premier vision surgery center, and we also understand that not everyone may be a good candidate for surgery. This has inspired a new direction which allows us to serve you for all of your vision care needs.

We are pleased to announce the addition of four new designer optical boutiques located in Green Hills, Gallatin, Rivergate and Smyrna. Like everything we do, we've been very selective in bringing only the best brands and advanced custom lens technology for glasses and sunglasses, so you can see every detail in life more vividly and enjoy the latest fashions in eye wear.

When you come to Loden iVision, you are part of our family. We're continuously striving to advance our services to provide the Nashville community with a trusted, locally-owned center for outstanding, full-service vision care.

We invite you to visit our new clinics and optical boutiques to shop our large optical selection, have your eye exam, free iLASIK screening, or to purchase a gift card to give the gift of sight to someone you love.

Seeing the clock clearly for the first time immediately after iLASIK surgery.
The indescribable joy of this moment for our patients is felt by everyone in the room!

Our new Rivergate location was opened in December 2015. This is home to one of our two state-of-the-art iLASIK surgery centers, our first designer optical boutique, a retina specialty clinic, general eye care clinic, dry eye speciality clinic and our headquarter administrative offices.

520 Rivergate Parkway | Goodlettsville, TN
